The Structure of Number Words from 1 to 1000

The number words from 1 to 1000 follow a pattern based on the decimal system, with specific conventions for numbers below twenty, multiples of ten, hundreds, and the thousands.

Basic Building Blocks

- Numbers 1?19: These are unique words that often need to be memorized, as they do not follow the regular pattern of combining other words.

Examples: one, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen, eighteen, nineteen.

- Multiples of ten from 20?90: These form the base for constructing larger numbers.

Examples: twenty, thirty, forty, fifty, sixty, seventy, eighty, ninety.

- Hundreds: Numbers like 100, 200, 300, etc., are formed by combining the number word for the digit with "hundred."

Examples: one hundred, two hundred, three hundred, etc.

- Thousand: The largest number in the chart, represented as "one thousand."

Patterns and Rules in Number Words

Understanding the rules and patterns in number words can significantly simplify learning and memorization.

- Numbers from 1 to 19

These are mostly irregular and must be memorized:

- one, two, three, four, five, six, seven, eight, nine, ten
- eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen, eighteen, nineteen

- Tens (20, 30, ..., 90)

Starting from twenty, the pattern involves adding the unit to the ten:

- twenty, thirty, forty, fifty, sixty, seventy, eighty, ninety

- Combining Tens and Units (21?99)

For numbers above 20 that are not multiples of ten, combine the tens word with the unit, separated by a hyphen:

- twenty-one, twenty-two, ..., twenty-nine
- thirty-one, thirty-two, ..., thirty-nine
- and so on, up to ninety-nine.

- Hundreds (100, 200, ..., 900)

Formed by combining the digit's number word with "hundred":

- one hundred, two hundred, three hundred, ..., nine hundred

- Combining Hundreds with Tens and Units (101?999)

Numbers between hundreds are constructed as:

- [hundred word] + [and] + [number from 1 to 99]

For example:

- one hundred and twenty-one
- three hundred and forty-five
- nine hundred and ninety-nine

Note: In British English, "and" is typically used between hundreds and the remaining part; in American English, it is often omitted.

Special Cases and Exceptions

While most number words follow standard patterns, some exceptions and conventions are important:

- Numbers less than 20 are unique words and do not follow a pattern.
- Hyphenation is used between tens and units for numbers 21?99 (e.g., twenty-one).
- Use of "and" varies by dialect, especially in large numbers.
